Re: Granite Ledges of Concord Assisted Living Facility / Concord, NH

Dear Rick:

I would like to thank Stanlin Energy for the opportunity to utilize their boiler draft induction technology in our Granite Ledges building located in Concord, New Hampshire. The Stanlin system has been in operation for over 2 years now and we couldn't be more pleased with the results.

As you know we decided to move forward with the installation of the system when presented with the initial test calculations that showed an average natural gas consumption reduction in excess of 30%. The actual results have been better than projected; and with the rapidly escalating fuel prices, our savings continue to grow month after month.

An added benefit to the reduction in fossil fuel usage is the reduced emissions this technology provides. While the Stanlin system helps us increase our customer satisfaction and our corporate image as an energy conscious company our bottom line continues to grow for our stockholders.

Thank you Stanlin Energy!

Sincerely,

Henry St. Hilaire  
VP Property Management & Construction
